CVD Translational Research Seminar Series

Tuesday, December 13, 2016

4-5:30 pm

**Albert Sherman Center
AS9-2072 Conference Room**

Please join us for a new monthly seminar series that will discuss the various mechanisms underlying coronary atherosclerosis and its major pre-disposing factors and the different ways by which this leading cause of morbidity and mortality can be prevented and effectively managed. Each of our monthly sessions will feature an experienced basic scientist and a clinician/public health researcher.

“A Metabolic View of Cardiovascular Disease”

DECEMBER PRESENTER:

**Michael Czech, PhD
Chair and Professor
Program in Molecular Medicine**
