

Present

It does take a village to advance women in academic biomedicine

Sandra K. Masur, PhD

Professor of Ophthalmology and Pharmacological Sciences
Director, Office of Women's Careers
Icahn School of Medicine at Mount Sinai

Dr. Masur is the founding Director of the ISMMS Office for Women's Careers and was Associate Dean for Faculty Development. Her research laboratory at Mount Sinai was funded for 35 years by the NIH, first for investigation of hormonal control of membrane transport and later for studies of the molecular and cellular mechanisms of wound healing. Dr. Masur was a member of the governing council of the American Society for Cell Biology (ASCB) and was chair of the Women in Cell Biology Committee of ASCB. In 2015 the ASCB established the Sandra K. Masur Senior Leadership award to honor individuals with exemplary achievements in cell biology who also are outstanding mentors.
