UMCCTS PILOT PROJECT PROGRAM (PPP) 2016 - REQUEST FOR LETTERS OF INTENT

INTRODUCTION AND PURPOSE
A major goal of the UMass Center for Clinical and Translational Science (UMCCTS) is to accelerate the translation of basic discoveries into practical, cost effective solutions that improve human health. Building upon our strong reputation as a world-class research institution, producing noteworthy advances in clinical and basic research, the UMCCTS provides the infrastructure necessary to support outstanding clinical and translational investigators and their work.

The UMass Center for Clinical and Translational Science is announcing the next funding round for the Pilot Project Program (PPP). This program differs from other intramural funding in that the key goal of PPP funding is to effect a qualitative change in the way the work is conducted. Individual project awards (up to $50,000 for 1 year) will be made on a competitive basis to enable investigators to accelerate the translation of innovative discoveries into:

- New understanding and/or diagnosis of a disease process
- New devices, therapeutics, and vaccines for the treatment and/or prevention of disease
- New standards of care in the practice of community medicine
- New approaches to community-based research demonstrating true bi-directionality between community and academia
- New methodologies to leverage institutional strengths and new initiatives
- The pursuit of high-risk, high reward studies

The intent of the funding is to speed up the rate of progress to move a research project, clinical finding or other discovery into a broader network of activities, while maximizing the breadth of transdisciplinary skills applied to the research question. We are particularly interested in proposals which feature a clinical scientist working with a basic scientist, proposals with an emphasis on community-based research, and proposals that PPP that support the career development of new investigators.

Thank you for your interest in Clinical and Translational Science. We look forward to your ideas.

ELIGIBILITY
The Principal Investigator must be a UMMS Worcester faculty member, but collaborations with faculty on any UMass campus are encouraged. You are welcome to have external or internal collaborators, but this is not a requirement.

All applicants must become members of the UMCCTS. Membership is free, easy and entails completion of a quick, on-line membership form.

ALLOWABLE USE OF FUNDS
PPP funding can support a full array of resources, including core user fees for services such as writing assistance in preparing an IRB application or biostatistics consults. Funds are typically used for student/postdoc support, reagent costs, and small equipment. PI support up to 10% is allowed. Indirect costs are not allowed.

DEFINITIONS OF CLINICAL AND TRANSLATIONAL RESEARCH
NIH defines Clinical Research as:
• Patient-oriented research. Research conducted with human subjects (or on material of human origin such as tissues, specimens and cognitive phenomena) for which an investigator (or colleague) directly interacts with human subjects. Patient-oriented research includes: (a) mechanisms of human disease, (b) therapeutic interventions, (c) clinical trials, or (d) development of new technologies.

• Epidemiological and behavioral studies.

• Outcomes research and health services research.

**Translational Research** as:

• The process of applying ideas, insights, and discoveries generated through basic scientific inquiry to the treatment or prevention of human disease.

**OVERSIGHT**

The PPP is overseen and administered by the Scientific Review Committee of the UMass Center for Clinical and Translational Science. The Review Committee makes funding decisions based upon the scientific merits and potential impact of the proposals.

**CRITERIA FOR AWARDS**

The evaluation criteria that are used to review proposals include the following:

• Intellectual Merit – projects that include all efforts to enhance the impact of scholarly endeavors on benefiting the human condition, which for the purposes of this fund will include enabling technologies, will be considered for funding

• Growth Opportunity – projects that demonstrate the opportunity to be leveraged to attract and secure outside funding from federal, state, industry, foundation and other sources will be considered for funding

• Use of UMCCTS Resources - Applicants will receive added consideration from the reviewers if they plan to use one or more of the research resources available through the UMCCTS.

**APPLICATION AND REVIEW PROCESS**

**Letters of Intent** - Due date: November 21, 2016

*Describe in two (2) pages or less* the work that has motivated you to apply. Do not attempt to document the key findings at this LOI stage. The next phase of the process will entail a full proposal. Rather, the Letter of Intent review process seeks to make two determinations:

1. That the project meets one or more of the definitions of clinical and translational research defined above.

2. That the availability of PPP funding would accelerate the translation of innovative, cutting edge research into:
   - New understanding and/or diagnosis of a disease process;
   - New devices, therapeutics, and vaccines for the treatment and/or prevention of disease;
   - Support for junior investigators;
   - New standards of care in the practice of community medicine;
   - New approaches to community-based research demonstrating true bidirectionality between community and academia;
   - New methodologies to leverage institutional strengths and new initiatives; and/or
   - The pursuit of high-risk, high reward studies.

References are not required but if included do not count as part of the two page limit. Budgetary information is not required at the LOI stage.
Letters of Intent (LOI) will be reviewed by the UMCCTS Scientific Review Committee to determine which projects are significantly linked to the criteria listed above. Based on this review, the most promising projects will be selected for full proposal submission. Full proposals will be subject to a standard NIH-type study section assessment.

Please email your Letter of Intent (2 pages or less) as an attachment (Word or PDF) to: ccts@umassmed.edu on or before Monday, November 21, 2016 by 5:00 PM (EST).

Full proposals will be due on Tuesday, January 17, 2017 for those selected finalists.
