Hero Slider Container Block

A Hero Slider Container is created and housed in the Assets Pane. This Hero Slider type is used to show one image at a time and scroll through the other images in the interval assigned or when manually clicking through the image series.

Creating a Hero Slider Container Block

1. **Open** the Asset Pane. **Select** the Blocks tab and **scroll** to your departments Global Library where you will be creating the Hero Slider Container Block.

2. **Click** the Pull-down menu associated to the selected folder and **select** New Block.
3. The New Block page will appear. **Name your block** and **scroll down** the page until you see the Hero Slider options. **Select** Hero Slider Container.

![Image of New Block page](image)

4. The following screen will appear, **Publish** this block.

![Image of Publish block](image)

**Note:** You have just created the **Container Block** that will hold your image blocks.

**Creating Hero Slider Image Block**

Now you will create the **Image Blocks** that will be included within the Hero Slider Container. Each block will contain one image.

1. **Open** the Asset Pane, **Select** the Blocks tab and scroll to your department’s Global Library where you created the Hero Slider Container Block.
2. **Click** the button to add another block.

3. **Name your block** and **scroll down** the page until you see the Hero Slider options and select Hero Slider IMAGE option.

![Hero Sliders](image)

4. The following page will appear.
   a) **Add the Slide Image** by **selecting** the button. **Scroll** through your global files and select the first image you would like to add to the Hero Slider Container.
   b) **Enter** the Image Alt Description. (This should be a description of the individual picture.)
   c) **Click** the Done button.
5. **Publish** the Image block. You will now see your Image block located with your other blocks in the asset pane.

6. Repeat steps 1-5 to add multiple image blocks.

Note: You have now added your slider images to blocks.

Adding Hero Slider Image Block to the Hero slider Container

Now we will add the Image blocks to the Hero Slider Container we added above.

1. Return back to the **Assets pane** and select the original Hero Slider Container you first added.

2. Select the button to open the Forms Editing Pane. The following page will appear:
3. **Expand the Assets Pane** and pin it so it will remain part of the screen.

4. **Scroll** to the Image Blocks you previously created.

5. **Drag your Image Blocks** into the Clickable Hero Slider Content Area.

![Image Blocks](image.png)

6. **Publish** the container block.

   Note: You have now added your Hero Slider image blocks to the Hero Slider Container.

---

### Add the Hero Slider Container Block to a page

Now we will add the Hero Slider Container to an active page and publish it.

1. In your Navigation Pane, **navigate** to the page you wish to add your Hero Slider Container Block.

2. **Open your Assets Pane** and **scroll** to the Hero Slider Container Block.

3. **Select and drop** the Hero Slider Container Block into the section of the page you wish to appear.

![Hero Slider Container](hero-slider.png)
4. **Publish** your page.

Replacing an Image Within a Hero Slider Container Block

Replacing your image in the Assets Pane will automatically update the image in all locations in which it appears.

5. **Open the Assets Pane** and select the Files Tab

6. **Scroll** to the location where your images are being stored.

7. **Right click** the item and select **Create New Version**

8. **Select** Choose File to search for the new file.

9. **Click Save.**
Removing an Image from a Hero Slider Container Block

1. **Open your Assets Pane** and **Select** the Blocks tab.

2. **Scroll** to the location you stored your Hero Slider Container Block.

3. **Double Click** on the Hero Slider Container Block to open it up for Editing.

4. **Select** the Forms Editing Pane.

5. **Click** the drop-down Menu of the Image you wish to remove and select Remove.

6. **Publish** the Page.
