Greetings from the Chair

We are clearly moving ahead in all areas of the department's strategic initiatives, as what I have shared at the department meeting. We have established the Inpatient Planning Group and have been successfully managing the DMH funding reductions. Research Day was a resounding success with Dr. Josephine Briggs, director of NIH National Center for Complementary and Alternative Medicine, as the Keynote Speaker. Three new specialty clinics will be opening soon! We continue to promote faculty and staff mentoring in our effort to develop a workforce of the future. There are *many* more areas of success too numerous to mention which we will continue to keep you updated on in future department meetings. Thank you and best to everyone on continued successes!

Doug
