## Greetings from the Chair

Happy New Year to faculty, staff, residents and friends of the Department of Psychiatry.

The new year signals a time of both reflection and inspiration. As I reflect on 2009, I am struck by the tremendous growth in the Department in all areas. New clinical specialty programs, cross divisional efforts, unprecedented research funding and the addition of new fellowships all reflect the hard work and dedication of all members of the department. The year was a resounding success.

As I look toward the future in 2010, I am inspired by the promise of even more new partnerships. We continue to create new and innovative clinical programs and initiatives, work to promote stellar faculty and staff and train the best and the brightest trainees. The new year holds many promises.

Thank you for your individual contributions and team collaborations.

Best,

*Doug*

## Announcements

We would like you to be aware of a great movie rental, “**THE SOLOIST**,” starring Jamie Foxx and Robert Downey, Jr. It is a true story about a street musician who is befriended by a newspaper columnist who takes an interest in his life. The story is poignant, gripping, and not at all unfamiliar to anyone acquainted with an individual or loved one coping with mental illness. This movie is recommended to us by **Tunefoolery Concert Ensembles** from Boston, a unique and courageous group of over 50 musicians with psychiatric disabilities who play and perform music as a way towards healing and recovery. The musicians are auditioned and Tunefoolery offers its members opportunities to play and perform over 75 gigs annually as a way towards healing and recovery.
