

## **UMMHC Strategic Plan Implementation Supported by the Office of Program Development**

In September 2009, the University of Massachusetts Memorial Health Care (UMMHC) Board of Directors voted to adopt the 2009-2013 Strategic Plan and the organization transitioned from the Strategy Formulation Stage of the process to the Strategy Execution phase.

The strategy execution/deployment phase is where the strategy is put into action. The plan identifies four strategic goals. For each goal area, a workgroup has been assembled and each workgroup is responsible for identifying and defining strategic priorities and objectives.

UMMHC has asked the UMMS/CWM Office of Program Development and Enterprise Project Management Office and (OPD/EPMO) to provide project management support and infrastructure to UMMHC leadership to ensuring the successful execution and deployment of the strategic plan.
