

# Patient Visiting Policy Changes during Flu Season

To help our patients and staff avoid the flu ...

- **Immediate family only should visit**  
(spouses/partners, parents, siblings, grandparents, or children age 14 and older)
- **Children under 14 years of age** are asked not to come to the hospital unless they are patients.
- **Only two visitors per patient at a time.**
- **Individuals with fever, cough or respiratory symptoms** should not visit.
- **People in contact with someone with flu-like illness in the last two days** may be carrying the flu and be contagious. We ask that they do not visit.

Some of our specialty care units have additional visiting policies.

Please check with our staff.
