

Biosketch Changes and Publishing Agreements

Leah Honor & Sally Gore

Research & Scholarly Communication Services

Key Takeaways

- Ensure all accounts are linked: ORCID, eRACommons, NCBI
- Update publications in MyBibliography and/or ORCID
- Use the SciENCv tool for NIH Commons Forms templates and ensure certification is current as of Sept 26, 2026 update
- Review library publication agreements and open access support

Getting started

- Step 1: NCBI account and ORCID
 - Do you already have a NCBI account?
 - Is your account linked to eRA Commons?
 - Is your ORCID linked to eRA Commons?
- Step 2: My Bibliography
 - Are your citations up to date?
- Step 3: Use SciENcv to generate a primary biosketch

For instructions and guidance, see: libraryguides.umassmed.edu/biosketch

Add your citations, ideally from PubMed

If your article is not in PubMed, enter the information from an RIS file or manually.

The screenshot shows the 'My Bibliography' page for Catherine Tess Grynock. The page includes a search bar, a list of citations, and a dropdown menu for adding new citations. The dropdown menu is highlighted with a red circle and contains three options: 'From PubMed', 'From a file', and 'Manually'. The list of citations includes three entries, each with a checkbox, a citation snippet, and a 'Public Access Compliance' status. The first two entries have a '2 Awards' button, while the third has a 'Not applicable' status.

Biosketch and Biosketch Supplement Elements

NIH Biographical Sketch Common Form:

Identifying Information, Organization and Location

- This is automatically pulled from eRA Commons, and not all data fields can be edited

Section A: Professional Preparation

Section B: Appointments and Positions

Section C: Products – citations drawn from linked MyBibliography or ORCID only

- 5 products closely related to the proposed project
- 5 other significant products highlighting contributions to science

Biographical Sketch Supplement:

Section A: Personal Statement

- 3500 character limit
- No associated citations

Section B: Honors

- Limited to 15 entries

Section C: Contributions to Science

- Up to 5 entries describing significant contributions to science
- Limited to 2,000 characters each
- Can reference previously added products, but no citations allowed

Identifying Information, Organization and Location

Identifying Information, Organization and Location * [EDIT](#) !

In this section, disclose the information requested regarding the individual and their associated organization and location. All fields are required unless otherwise noted.

Document Name: NIH biosketch Common form sample	Persistent Identifier (PID): https://orcid.org/0000-0001-7685-8802
Name: Leah Honor	eRA Commons ID: HONORL
Position Title:	Last updated: January 13, 2026

- Data pulled directly from eRA Commons
- Will need to be edited for title, institution, etc
- ORCID is not editable – make sure it is correctly linked in eRA Commons

Adding Appointments and Positions

B. Appointments and Positions *

A list, in reverse chronological order by start date, of all the senior/key person's [academic](#), [professional](#), or [institutional](#) appointments and positions, beginning with the current appointment (including the associated organization and location). Appointments and positions include any titled academic, professional, or institutional position whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).

Senior/key personnel must only identify all domestic and foreign professional appointments and positions outside of the primary organization for a period up to three years from the date the applicant submits the proposal to the agency for funding consideration.

[+ ADD APPOINTMENT/POSITION](#)

2015 - 2016	No	Library Fellow	Lamar Soutter Library, UMass Chan Medical School	Worcester, Massachusetts		

Manually enter additional training as needed.

Products

C. Products

Provide a list of: (i) up to five products closely related to the proposed project; and (ii) up to five other significant products that highlight the senior/key person's Contributions to Science. The NIH Biographical Sketch Supplement will provide the opportunity to describe these contributions in more depth while referencing the other significant products cited in this section.

It is up to the individual to determine how to best organize this listing to demonstrate their ability to carry out the project. Acceptable products must be citable and accessible including but not limited to:

[What are acceptable products?](#) ▾

Each product must follow the [NIH Policy on Use of Hypertext in NIH Grant Applications](#) and include full citation information:

[What is included in a full product citation?](#) ▾

Senior/key persons who wish to include publications in the products section of the biographical sketch that include multiple authors may, at their discretion, choose to list one or more of the authors and then "et al" in lieu of including the complete listing of authors' names.

Biographical Sketch Supplement: Personal Statement

NIH Biographical Sketch Supplement

This NIH Biographical Sketch Supplement provides instructions for submission by each individual identified as a [senior/key person](#) on a Federally funded research project submitting a Biographical Sketch Common Form. For NIH, these instructions also apply to all other individuals required to submit a biographical sketch.

This format page should be appended to the respective Biographical Sketch Common Form of each individual submitting a biographical sketch for NIH. The format of the NIH Biographical Sketch Supplement is provided below.

Asterisks () indicate required sections or fields.*

A. Personal Statement *

Briefly describe why you are well-suited for your role(s) in this project. Relevant factors may include: aspects of your training; your previous experimental work on this specific topic or related topics; your technical expertise; your collaborators or scientific environment; and/or your past performance in this or related fields, including ongoing and completed research projects from the past three years that you want to highlight.

[Note the following additional instructions for ALL applicants/candidates:](#) ▼

[Note the following instructions for specific subsets of applicants/candidates:](#) ▼

The Personal Statement is limited to 3,500 characters.

ADD PERSONAL STATEMENT

- Narrative section, no citations included
- Formatting is not encouraged
- See [FAQ documentation](#) (being rapidly updated so check back again when creating your own documents)

Biographical Sketch Supplement: Honors

- List any relevant academic and professional achievements and honors
- Students, postdoctorates, and junior faculty should include scholarships, traineeships, fellowships, and development awards, as applicable.
- Clinicians should include information on any clinical licensures and specialty board certifications that they have achieved.
- If the information is in eRA Commons, it may auto-populate this section in SciENcv if linked to NCBI account, but may require additional editing

Biographical Sketch Supplement: Honors

B. Honors *

List any relevant academic and professional achievements.

- Students, postdoctorates, and junior faculty should include information on any applicable.
- Clinicians should include information on any applicable.

The Honors Section is limited to no more than 15 entries.

ADD HONOR

C. Contributions to Science *

Contributions to Science

C. Contributions to Science *

All senior/key persons should complete the "Contributions to Science" section. Please enter N/A in the text field if no Contributions to Science will be provided.

Briefly describe up to five of your most significant contributions to science. While all applicants may describe up to five contributions, graduate students and postdoctorates may wish to consider highlighting two or three they consider most significant.

[For each contribution, indicate the following:](#) 

You may reference up to five products listed in the Other Significant Products section of your Biographical Sketch Common Form that are relevant to the contributions described in this section. There is no specific format for referencing the products in this section, however, it is recommended to refer to the title, use the author's last name, publication, and/or year of publication for ease of reference. Do not provide citations on the NIH Biographical Sketch Supplement.

Descriptions of contributions may include a mention of research products under development, such as manuscripts that have not yet been accepted for publication. These contributions do not have to be related to the project proposed in this application.

Each Contribution to Science is limited to 2,000 characters.

Certification

- Certification is required and can only be completed by the submitting researcher – not a delegate
 - If a delegate is preparing the Biographical Sketch, ensure they are doing so from within the researchers SciENCv account not their own, or else certification will be impossible
- Certification only becomes available once all fields are complete
- Can not download PDF without certifying – use ‘View Draft’ to review, only export once
- Only the SciENCv produced PDF is acceptable for submission – do NOT make any changes after download
- Certification system was updated Sept. 26, 2026 – any forms certified but not submitted before this date must be recertified and downloaded again

Certification

Certification

[VIEW DRAFT](#)

[↓ DOWNLOAD PDF](#)

Each senior/key person is required to complete the following certifications regarding the information provided in their Biographical Sketch:

I certify that the information provided is current, accurate, and complete. This includes but is not limited to information related to domestic and foreign appointments and positions.

I also certify that, at the time of submission, I am not a party to a [malign foreign talent recruitment program](#).

Misrepresentations and/or omissions may be subject to prosecution and liability pursuant to, but not limited to, 18 U.S.C. §§ 287, 1001, 1031 and 31 U.S.C. §§ 3729-3733 and 3802.

To be acceptable to the Federal research funding agency, the date of the signature must be within the past 12 months from when the document is submitted to the Federal research funding agency.

NIH Current and Pending (Other) Support Common Form

Proposals and Active Projects *

In this section, disclose ALL proposals and active projects in accordance with the definitions for [current and pending \(other\) support](#).

Asterisks () indicate required sections or fields.*

The Status of Support types are defined as:

Current – all active projects, or projects with ongoing obligations, from whatever source irrespective of whether such support is provided through the proposing organization or is provided directly to the individual.

Pending – any proposal that is being considered for funding from a potential funding organization (including this proposal) irrespective of whether such support is provided through the proposing organization or is provided directly to the individual.

ADD PROPOSALS AND ACTIVE PROJECTS

In-Kind Contributions

In this section, disclose ALL in-kind contributions with an estimated dollar value of \$5000 or more **and** that require a commitment of the individual's time. An in-kind contribution is a non-cash contribution provided by an external entity that directly supports the individuals' research and development efforts. An in-kind contribution may include but is not limited to: real property; laboratory space; equipment; data or data sets; supplies; other expendable property; goods and services; employee or student resources. In-kind contributions with an estimated value of less than \$5000 need not be reported.

Asterisks () indicate required sections or fields.*

The Status of Support types are defined as:

Current – all in-kind contributions obligated from whatever source irrespective of whether such support is provided through the proposing organization or is provided directly to the individual.

Pending – all in-kind contributions currently under consideration from potential funding organizations irrespective of whether such support is provided through the proposing organization or is provided directly to the individual.

NIH Public Access Updates

- The updated [NIH Public Access Policy](#) is in effect and manuscripts accepted for publication in a journal on or after July 1, 2025, must be submitted to PubMed Central for public availability **without embargo** upon the official date of publication.
- To assist with compliance, NIH has developed a new website dedicated to the Public Access Policy which includes an overview of the policy, supplemental guidance, tips for submitting to PubMed Central, contact information, and FAQs. The site can be found at: <https://grants.nih.gov/policy-and-compliance/policy-topics/public-access>.
- Further updated information can be found:
 - **NIH Public Access Policy FAQs** (National Institutes of Health Office of Grants & Funding)
 - **The NIH Public Access Policy: Q&A for Authors** (Authors Alliance)
- Specific questions can be sent to SciencePolicy@od.nih.gov.
