I-Corps @ NCATS
Regional Short Course

What is the business case for your translational science?
Find out via the I-Corps@NCATS Regional Short Course. Based on the National Science Foundation’s Innovation Corps (I-Corps™) program, the premier federally-funded innovation and commercialization training in the U.S., I-Corps@NCATS provides biomedical scientists, clinician scientists and engineers with a new approach to accelerate the translation of discoveries from the lab to clinical practice.

Who should attend?
Teams of faculty, postdocs and/or students with biomedical innovations or ideas.

Why should I attend?
The five-week I-Corps@NCATS Regional Short Course will help you connect with potential customers for your research projects, protocol, service, or prototype.

- Determine the commercial viability of your innovation.
- Develop a successful business case for securing funding.
- Expand your network of innovation partners, mentors, and potential collaborators.
- Develop a new way of thinking about your research.
