

CRISPR Workshop

We are very excited to announce the full schedule of WAWM for this academic year. First set of talks will be held on Oct-3rd in Bio-Tech II conference room (second floor). Oscar Duan from the Ambros lab at UMMS will present his work, followed by a CRISPR workshop. The goal of the workshop is to share protocols and discuss strategies to improve the CRISPR success rate in *C. elegans*. During the workshop, we plan to have one or two short talks covering the CRISPR protocols that seem to work, followed by a group discussion. Please contact us if you are interested in presenting your CRISPR data. Also, we strongly encourage you to email us your questions prior to the workshop so that we can put them together and address during the group discussion. We look forward to seeing you at the WAWM.
