

Global Health Outreach Resident Expectations

- Refocus on honing physical examination skills and clinical knowledge in absence of technology
- Obtain skills for delivering anesthetics in austere environments
- Opportunity to see diseases at further stages of development
- Develop flexibility to provide care in varied work environments and be creative in clinical and technical problem solving
- Enhance the ability to work in teams, focus on communication and cultural sensitivity
- Add to the variety of patient populations and diseases to which the resident will be exposed
- Enhance skills of residents as teachers
