Original Research

Receipt of Overlapping Opioid and Benzodiazepine Prescriptions Among Veterans Dually Enrolled in Medicare Part D and the Department of Veterans Affairs. A Cross-sectional Study

593

R. Carico, X. Zhao, C.T. Thorpe, J.M. Thorpe, F.E. Sileanu, J.P. Cashy, J.A. Hale, M.K. Mor, T.R. Radomski, L.R.M. Hausmann, J.M. Donohue, K.J. Suda, K. Stroupe, J.T. Hanlon, C.B. Good, M.J. Fine, and W.F. Gellad

Receipt of overlapping prescriptions for opioids and benzodiazepines has been associated with an increased risk for overdose. This cross-sectional study compared the proportion of veterans who had overlapping opioids and benzodiazepines among those who received prescriptions solely from VA, solely from Medicare Part D, or from both.

Divergent Long-Term Detection Rates of Proximal and Distal Advanced Neoplasia in Fecal Immunochemical Test Screening Programs. A Retrospective Cohort Study

602

M. Zorzi, C. Hassan, G. Capodaglio, E. Narne, A. Turrin, M. Baracco, A. Dal Cin, A. Fiore, G. Martin, A. Repici, D. Rex, and M. Rugge

We know from previous studies that fecal immunochemical screening is more effective at detecting cancer in the distal rather than the proximal colon. Zorzi and colleagues report how this test property changes during 6 rounds of repeated screening.

Kidney Damage Biomarkers and Incident Chronic Kidney Disease During Blood Pressure Reduction. A Case-Control Study

610

W.R. Zhang, T.E. Craven, R. Malhotra, A.K. Cheung, M. Chonchol, P. Drawz, M.J. Sarnak, C.R. Parikh, M.G. Shlipak, and J.H. Ix, for the SPRINT Research Group

Intensive lowering of systolic blood pressure may be associated with kidney injury. This nested case-control study examined changes in 9 urinary biomarkers of kidney damage among persons with incident chronic kidney disease in the intensive (<120 mm Hg) versus standard (<140 mm Hg) treatment groups of SPRINT (Systolic Blood Pressure Intervention Trial).

Swan, Ganz, and Their Catheter: Its Evolution Over the Past Half Century

636

A.B. Thakkar and S.P. Desai
Jeremy Swan and William Ganz developed their eponymous pulmonary artery catheter in the 1970s, and its use came to define critical care medicine in the late 20th century. This article describes the natural life cycle of this catheter as new, less invasive technology arrived to replace it.

Ten Principles for More Conservative, Care-Full Diagnosis

643

G.D. Schiff, S.A. Martin, D.H. Eidelman, L.A. Volk, E. Ruan, C. Cassel, W. Galanter, M. Johnson, A. Jutel, K. Kroenke, B.L. Lambert, J. Lexchin, S. Myers, A. Miller, S. Mushlin, L. Sanders, and A. Sheikh
Physicians must navigate a balance between under- and overdiagnosis, both of which may harm patients. The authors discuss core principles to help find this balance and foster a thoughtful, patient-centered, more conservative approach to diagnosis.

Reconciling the Discrepancies in Medicine's Relationship to Medical Marijuana 646

I. Braun and J. Tulskey

Despite medical marijuana's increasing use and acceptance, physician understanding of the risks and benefits of its use, guidance from medical associations, and accommodations for documentation in electronic health records are lacking. The authors discuss these gaps, why they exist, and what can be done to address them.

Disappearance of the National Guideline Clearinghouse: A Huge Loss for Evidence-Based Health Care 648

Z. Munn and A. Qaseem, for the American College of Physicians and the Joanna Briggs Institute

Evidence-based guidelines play a pivotal role in optimizing quality of care and improving clinical outcomes for patients. In recognition of this important role, the National Guideline Clearinghouse (NGC) was created in 1998. In July 2018, the NGC went dark because of the federal government's budgetary cuts. This commentary discusses the potential negative consequences of this action.

Editorials

In Screening for Colorectal Cancer, Is the FIT Right for the Right Side of the Colon? 650

C.A. Doubeni and T.R. Levin

Zorzi and colleagues reported on the yield from 6 rounds of biennial colorectal cancer screening with the fecal immunochemical test (FIT) from 2002 to 2015 in a fixed cohort. The editorialists discuss the study findings, the advantages of FIT, and the need for studies to examine whether screening with FIT prevents right colon cancer deaths.

Time to Change the Way We Approach Opioid Use Disorder: A Challenge to the Status Quo 652

K. Hawk and G. D'Onofrio

In their article, Martin and colleagues address buprenorphine treatment for opioid use disorder. The editorialists discuss the findings and why they believe that we need to disrupt current practice and change our approach to treatment of persons with opioid use disorder.

Unequal Pay for Equal Work: Where Are We Now? 654

M.R. Saunders and B.J. Turner

Read and colleagues' cross-sectional survey of internists showed that the salary gap between women and men in the medical profession has long been an unfortunate, unconscionable norm that persists in internal medicine. The editorialists discuss the findings and speculate about strategies that could promote gender equity in physician compensation.

Original Research

β -Blocker Use in Pregnancy and the Risk for Congenital Malformations. An International Cohort Study 665

B.T. Bateman, U. Heide-Jørgensen, K. Einarsdóttir, A. Engeland, K. Furu, M. Gissler, S. Hernandez-Diaz, H. Kieler, A. Lahesmaa-Korpinen, H. Mogun, M. Nørgaard, J. Reutfors, R. Selmer, K.F. Huybrechts, and H. Zoega

β -Blockers are among the most commonly used antihypertensive medications during pregnancy, but concerns have been raised about their potential teratogenic effects. These authors analyzed data from nationwide health registries in 5 Nordic countries and the U.S. Medicaid population to examine the risk for congenital malformations in offspring of women with hypertension who were exposed to β -blockers during the first trimester of pregnancy.

Mechanisms That Contribute to a Profound Reduction of the HIV-1 Reservoir After Allogeneic Stem Cell Transplant 674

M. Salgado, M. Kwon, C. Gálvez, J. Badiola, M. Nijhuis, A. Bandera, P. Balsalobre, P. Miralles, I. Buño, C. Martinez-Laperche, C. Vilaplana, M. Jurado, B. Clotet, A. Wensing, J. Martinez-Picado, and J.L. Diez-Martin, for the IciStem Consortium

The multifactorial mechanisms associated with radical reductions in HIV-1 reservoirs after allogeneic hematopoietic stem cell transplant (allo-HSCT) are not fully understood. In this nested case series within an observational cohort, the authors investigate the mechanism of HIV-1 eradication associated with allo-HSCT.

Smoking and Lung Cancer Mortality in the United States From 2015 to 2065. A Comparative Modeling Approach 684

J. Jeon, T.R. Holford, D.T. Levy, E.J. Feuer, P. Cao, J. Tam, L. Clarke, J. Clarke, C.Y. Kong, and R. Meza

Although lung cancer mortality has decreased since the 1990s, lung cancer remains the leading cause of cancer death in the United States. This study used 4 simulation models of the natural history of lung cancer to project the effect of existing tobacco control efforts on lung cancer and mortality rates from 2015 to 2065.

On-Demand Sildenafil as a Treatment for Raynaud Phenomenon. A Series of *n*-of-1 Trials 694

M. Roustit, J. Gai, O. Gaget, C. Khouri, M. Mouhib, A. Lotito, S. Blaise, C. Seinturier, F. Subtil, A. Paris, C. Cracowski, B. Imbert, P. Carpentier, S. Vohra, and J. Cracowski

Raynaud phenomenon (RP) characteristically occurs during exposure to cold. Using a series of randomized, double-blind, *n*-of-1 trials, the authors assessed the efficacy and safety of on-demand sildenafil as an alternative to daily treatment for RP.

Position Paper

Reducing Firearm Injuries and Deaths in the United States: A Position Paper From the American College of Physicians 704

R. Butkus, R. Doherty, and S.S. Bornstein, for the Health and Public Policy Committee of the American College of Physicians
Firearm-related injuries continue to threaten public health in the United States. This position paper provides policy recommendations from the American College of Physicians that are aimed at reducing firearm-related morbidity and mortality.

Ideas and Opinions

San Francisco Voters End the Sale of Flavored Tobacco Products Despite Strong Industry Opposition 708

Y.T. Yang and S. Glantz

In June 2018, voters in San Francisco supported implementation of a law prohibiting the sale of flavored tobacco products, including menthol cigarettes and flavored vaping liquids, despite a \$12 million campaign funded almost entirely by the R.J. Reynolds Tobacco Company to oppose the law. This commentary discusses the vote and the public health campaign to support it.

The U.S. Food and Drug Administration's Dilemma: How Tightly to Regulate Electronic Cigarettes? 710

S.A. Schroeder

In response to mounting concern about the use of electronic cigarettes by young people, the commissioner of the U.S. Food and Drug Administration recently released an action plan together with a demand that manufacturers report how they will address the problem and a threat to accelerate regulations. The author discusses the potential consequences of such actions, as well as inaction, and the potential risks and benefits involved.

Elements of a Comprehensive Public Health Response to the Opioid Crisis 712

M. Levine and M. Fraser

The Centers for Disease Control and Prevention's report of overdose deaths from prescription and illicit opioids underscores the need for urgent action to prevent overdose deaths, promote evidence-based programs for treatment and recovery, and implement programs and policies that support primary prevention of addiction. The authors discuss the report and its implications, as well as how no single public health tactic or policy will end the opioid crisis.

What Can Medicine Learn From Social Science Studies of Sexual Harassment? 716

L.M. Cortina and R. Jagsi

The medical profession is not immune from sexual harassment, and culture change is needed. The authors discuss taxonomies and findings from the social sciences that merit consideration by the medical profession as it strives to change culture to prevent sexual harassment.

Editorials

To β or Not to β ? Very Likely OK to β 718

J.G. Ray

The editorialist discusses Bateman and colleagues' findings and their clinical implications for caring for pregnant women who have hypertension or other conditions that require β -blockers.

Learning About "Known Unknowns" and "Unknown Unknowns" to Cure HIV 719

R. D'Aquila

How are latent HIV reservoirs so radically depleted by allo-HSCT? Salgado and colleagues report on the largest number of HIV-infected patients receiving allo-HSCT with CCR5 wild-type donor cells for hematologic disease who have been studied to date and begin to address this question. The editorialist discusses the implications of the findings.

Smoking Trends and Lung Cancer Mortality: The Good, the Bad, and the Ugly 721

G.A. Silvestri and M.J. Carpenter

Jeon and colleagues reported computer models that project lung cancer mortality among U.S. adults. The editorialists discuss the important messages about smoking, screening, and lung cancer that these projections provide.

Expanding the Public Health Approach to Gun Violence Prevention 723

P.J. Cook

The editorialist discusses the American College of Physicians' position paper on reducing the public health crisis of firearm-related injury and how the focus and efforts of physicians and others should consider additional factors to help address the crisis.

What Can I Do as a Physician to Prevent Firearm Injury? 725

J.S. Kahn

This issue includes a position paper from the American College of Physicians on the health care crisis of firearm-related injury and a research study assessing perceptions of the problem among physicians and the public. The editorialist describes how and why he asks his patients about firearm safety.

Combined Gabapentinoid and Opioid Use: The Consequences of Shifting Prescribing Trends 727

D.C. Throckmorton and J. Woodcock

Gomes and colleagues explore the trends and consequences of the recent and striking increase in gabapentinoid prescribing, particularly in combination with opioids. The editorialists discuss these findings and

the need to carefully investigate the consequences of combined use of all central nervous system-active drugs.

[Abstract](#) | [Full Text](#)

 JAMA. 2018;320(17):1749-1750. doi:10.1001/jama.2018.16755

This Viewpoint compares and contrasts recommendations in the 2018 European Society of Cardiology/European Society of Hypertension (ESC/ESH) and 2017 American College of Cardiology/American Heart Association (ACC/AHA) blood pressure (BP) guidelines, focusing on definitions of high BP, treatment targets, and BP management for CKD and at older ages.

Abstract | **Full Text**

 JAMA. 2018;320(17):1751-1752. doi:10.1001/jama.2018.16579

In this Viewpoint, Eugene Braunwald and coauthor characterize the global prevalence of hypertension as an epidemic and call for collaborative efforts on the part of physicians, other health professionals, and governmental and nongovernmental agencies to develop innovative strategies to manage it, including screening and intervention in nontraditional settings such as barbershops and grocery stores.

Abstract | **Full Text**

☐ ☐ ☐ JAMA. 2018;320(18):1899-1909. doi:10.1001/jama.2018.16789

This 2018 Recommendation Statement from the US Preventive Services Task Force recommends screening for unhealthy alcohol use in primary care settings in adults, including pregnant women, and providing brief behavioral counseling to reduce unhealthy alcohol use (B recommendation) and concludes that evidence is insufficient to assess balance of benefits and harms of screening and counseling for alcohol use in primary care settings in adolescents (I statement).

About The Journal

Published since 1988, the *Journal of the American Board of Family Medicine (JABFM)* is the official peer-reviewed journal of the American Board of Family Medicine (ABFM). Believing that the public and scientific communities are best served by open access to information, *JABFM* makes its articles available free of charge. *JABFM* is indexed by PubMed, Medline, Index Medicus, and other services.

JABFM publishes six bimonthly issues per year, comprising original material from authors with new knowledge to contribute to the understanding and advancement of family medicine research and clinical practice. *JABFM* also serves as an important forum for the specialty of family medicine, and as a source of news from the ABFM.

Online access average: 772,473 hits per month in 2017.

Impact factor for 2017: 2.515.

[Past Issues](#)

[Collections](#)

[Supplements](#)

10.1542/peds.2018-0516C

We describe a model of surrogate decision-making that includes aspects of decision-making that other models simplify or omit, including problem structuring, sense-making, social relationships, and self-identity.

[PDF](#)

[□ Involving Youth With a Chronic Illness in Decision-making: Highlighting the Role of Providers](#)

Victoria A. Miller

Pediatrics Nov 2018, 142 (Supplement 3) S142-S148; DOI:

10.1542/peds.2018-0516D

In this article, I describe the role of providers in involving children and adolescents with a chronic illness in medical decision-making.

[PDF](#)

[□ A 4-Step Framework for Shared Decision-making in Pediatrics](#)

Douglas J. Opel

Pediatrics Nov 2018, 142 (Supplement 3) S149-S156; DOI:

10.1542/peds.2018-0516E

There is confusion regarding when and how to apply SDM in pediatric practice; this 4-step framework for SDM in pediatrics can be used to offer clarity.

[PDF](#)

[□ Pragmatic Strategies for Shared Decision-making](#)

Jennifer K. Walter, Jennifer Hwang, Alexander G. Fiks

Pediatrics Nov 2018, 142 (Supplement 3) S157-S162; DOI:

10.1542/peds.2018-0516F

Despite growing evidence to support SDM, there are limited examples of practical language for how a pediatric clinician should communicate to achieve it.

[PDF](#)

[□ Creating the Safety and Respect Necessary for “Shared” Decision-making](#)

Jodi Halpern

Pediatrics Nov 2018, 142 (Supplement 3) S163-S169; DOI:

10.1542/peds.2018-0516G

This article argues that SDM should begin with creating the appropriate conditions for safe emotional communication.

[PDF](#)

□ Supporting Family Decision-making for a Child Who Is Seriously Ill: Creating Synchrony and Connection

Vanessa N. Madrigal, Katherine Patterson Kelly

Pediatrics Nov 2018, 142 (Supplement 3) S170-S177; **DOI:**

10.1542/peds.2018-0516H

When supporting families and children in difficult decisions, clinicians should strive to create a human connection.

□ [PDF](#)

□ Titrating Clinician Directiveness in Serious Pediatric Illness

Wynne Morrison, Jonna D. Clark, Mithya Lewis-Newby, Alexander A. Kon

Pediatrics Nov 2018, 142 (Supplement 3) S178-S186; **DOI:**

10.1542/peds.2018-0516I

We describe a range of clinician directiveness that can be ethically appropriate in caring for children with serious illness and their families.

□ [PDF](#)

□ Cross-cultural Interactions and Shared Decision-making

Sabrina F. Derrington, Erin Paquette, Khaliah A. Johnson

Pediatrics Nov 2018, 142 (Supplement 3) S187-S192; **DOI:**

10.1542/peds.2018-0516J

We provide a case-based discussion of how cultural differences impact communication and decision-making with recommendations to optimize SDM in cross-cultural encounters.

□ [PDF](#)

□ Practical Wisdom, Rules, and the Parent–Pediatrician Conversation

Daniel Brudney

Pediatrics Nov 2018, 142 (Supplement 3) S193-S198; **DOI:**

10.1542/peds.2018-0516K

In this article, I present the standard process of bedside decision-making, discuss rules versus individual judgments, and examine the patient–doctor and parent–doctor conversations.

□ [PDF](#)

□ Tell Parents the Truth, but Tell It Slant

John D. Lantos

Pediatrics Nov 2018, 142 (Supplement 3) S199-S204; **DOI:**
