US Public Health Law in the Aftermath of COVID-19

The March issue of *AJPH* features a special section on challenges to public health law in the aftermath of COVID-19.

Select articles cover judicial review of public health powers, trends in US state public health emergency laws, and the 2023 US Supreme Court term and its implications for public health.

Other papers in this issue address topics such as adolescent health, reproductive rights, relationship violence, food access for rural households in the US, and more.

The *American Journal of Public Health* (*AJPH*) is dedicated to the publication of original work in research, research methods, and program evaluation in the field of public health. The mission of the journal is to advance public health research, policy, practice, and education.

Effect of Tight Glycemic Control on Pancreatic Beta Cell Function in Newly Diagnosed Pediatric Type 1 Diabetes: A Randomized Clinical Trial

Jennifer McVean, MD; Gregory P. Forlenza, MD; Roy W. Beck, MD, PhD; et al.

Abstract | Full Text

FREE *JAMA*. 2023;329(12):980-989. doi:10.1001/jama.2023.2063

This randomized clinical trial compares the efficacy of intensive glucose management, which included use of an automated insulin delivery system, vs standard care, which included use of a continuous glucose monitor, to achieve near normalization of glucose levels to preserve pancreatic beta cell function in youths with newly diagnosed type 1 diabetes.
