## Asynchronous activities:

### City of Worcester data

Instructor: Nikki Nixon, Epidemiologist, City of Worcester Division of Public Health

This webinar introduces Worcester city data as a way of characterizing and describing a population, including current COVID data and the clinical system's recent Social Deprivation Index data

Link will be available 10/20 at <https://www.umassmed.edu/fmch/communityhealth/sep/pophealth/shared-calendar-events/>

- Intent will be to introduce students to the types of data that can be collected and how they can shed light on the context of the communities from which their patients come
- Links will be provided so students can view data more fully.
- Session will introduce the CHA, the CHIP, and REACH (communities throughout the US are developing CHAs and CHIPs; health care providers and facilities can use those as road maps for identifying priority areas for attention and energy.)
- We encourage students who view the recording to develop and submit specific questions to be addressed in the live session

## Learning from the Uniform Data System – HRSA, AAFP

**Introduction to the UDS Mapper:** <https://www.udsmapper.org/tutorials.cfm>

This webinar is a general introduction to the UDS Mapper, a mapping and decision-support tool driven primarily from health center patient location data within the Uniform Data System (UDS). The UDS Mapper is a collaboration between the Health Resources and Services Administration (HRSA) and the American Academy of Family Physicians (AAFP) and is part of the HealthLandscape online mapping platform. This webinar will go over the basics of using the UDS Mapper, and is geared toward users who are new to the UDS Mapper or in need of a refresher. The webinar is open to the public and free of charge.

UDS Mapping Advanced Topic Webinar for October: **Update in September** from <https://www.udsmapper.org/webinars-and-presentations.cfm>

## Institute for Healthcare Improvement Virtual Learning Hour Series

**COVID19 and the Case for Contact Tracing:**

<http://www.ihi.org/resources/Pages/AudioandVideo/COVID-19-and-the-case-for-contact-tracing.aspx>

This Virtual Learning Hour focuses on: Key components of the Partners In Health contact tracing model, which is in wide use nationally

- The role of community health workers, social workers, and social supports
- Long-term financing
- The importance of health care system engagement and collaboration with public health departments

## Association of Clinicians for the Underserved webinar series

**Resources for Developing an Understanding of Health Disparities** - Susan White, MD

To be effective, primary care providers must develop an understanding of individual barriers as well as community barriers to good health. In this workshop, Dr. Susan White reviews online tools that offer both general and community specific interactive learning activities to help primary care providers better understand the community and the challenges of their patients. A variety of tools including Spent, bias assessment, medication simulation, Dartmouth Health Atlas, Google Maps, and community food resources will be presented. Watch a recording of the webinar [here](#).

**Addressing Race, Power and Privilege in Clinical Settings** - Heather-Lyn Haley, PhD

In this session, Dr. Heather-Lyn Haley will present frameworks and strategies to address issues around race, power, and privilege in clinical settings, with a focus on disrupting racism and improving clinical processes and outcomes. Watch a recording of the webinar [here](#).

## Census Bureau Webinars

[Creating Disability Demographic Snapshots using Census Data](#): Webinar in Celebration of the 30th Anniversary of the Americans With Disabilities Act

This webinar provides an introduction to readily available US Census Bureau data to create disability demographic snapshots for various geographic levels.

## **What Data Tell Us about COVID-19 in Racial and Ethnic Minority Communities**

Stephen Thomas, PhD

Professor Health Policy & Management, School of Public HealthDirector, Maryland Center for Health Equity, University of Maryland

<https://www.workcast.com/?cpak=5930614711046147&pak=9837344572753700>

**This talk begins at the 25:00 minute mark on the video.**

**This session provides background and context about the disproportionate impact of COVID-19 on racial and ethnic minority populations using the latest data. Additionally, the session will discuss the importance of and recommendations for collecting and using race/ethnicity data to ensure an equitable response.**
