

# Mind the Gap: Best Practices to Prevent Falling for Predatory Publishers and Conferences

Sally Gore, MS, MS LIS

Manager, Research & Scholarly Communication Services  
Lamar Soutter Library

A photograph of a train platform. The top half of the image shows dark, parallel train tracks receding into the distance. Below the tracks is a light-colored concrete wall. Painted on this wall in large, bold, black, sans-serif capital letters is the phrase "MIND THE GAP". Below the wall is a yellow tactile paving strip, and at the very bottom is a grey tactile paving strip with a circular pattern.

***MIND THE GAP***

## Part 1: Predatory Journals

# Skills

Know	Know what resources are available to identify potential journals for manuscript submission, and how to access them.
Understand and apply	Understand and apply criteria for journal selection.
Understand	Understand the difference between a legitimate and a predatory open access journal.
Apply	Apply criteria for vetting a journal prior to submission.

# In a nutshell...

The total number of  
scientific journals  
launched between  
1665 – 2007.

The total number of  
scientific journals  
launched in the last  
10 years.

# Finding a journal for manuscript submission

- ◇ Elsevier Journal Finder  
<http://journalfinder.elsevier.com/>
- ◇ Springer/BioMed Central Journal Suggester  
<https://journalsuggester.springer.com/>
- ◇ JANE  
<http://jane.biosemantics.org/>

# Elsevier Journal Finder

<http://journalfinder.elsevier.com/>

- ❖ Enter title and abstract of your manuscript
- ❖ Matches your manuscript to Elsevier journals
- ❖ Open access filter

The screenshot shows the Elsevier Journal Finder web application. At the top, there is a navigation bar with the 'journalFinder' logo, a cookie consent banner, and links for 'Find journals', 'About', and 'FAQ'. The main heading is 'Find journals', followed by a brief description of the tool's purpose. Below this, there is a search form with four input fields: 'Paper title', 'Paper abstract', 'Keywords', and 'Field of research'. Each field has a placeholder text. The 'Field of research' field is a dropdown menu. At the bottom of the form, there is a '+ Refine your search' link and a 'Find journals' button. A vertical 'Feedback' button is located on the right side of the page.

Welcome to journalFinder. We use cookies to enhance your browsing experience. [Learn more](#) OK

journalFinder [Find journals](#) [About](#) [FAQ](#)

## Find journals

Enter title and abstract of your paper to easily find journals that could be best suited for publishing. JournalFinder uses smart search technology and field-of-research specific vocabularies to match your paper to scientific journals.

[More on how it works](#)

Paper title  
Enter your paper title here

Paper abstract [Don't have an abstract?](#)  
Enter your paper abstract here

Keywords

# JANE (Journal/Author Name Estimator)

**Jane**  
Journal/Author Name Estimator

Insert your title and/or abstract here: (or, click [here](#) to search using keywords)

[Scramble](#) [Clear](#) [Show extra options](#)

[Find journals](#) [Find authors](#) [Find articles](#)

**Welcome to Jane**

Have you recently written a paper, but you're not sure to which journal you should submit it? Or maybe you want to find relevant articles to cite in your paper? Or are you an editor, and do you need to find reviewers for a particular paper? Jane can help!

Just enter the title and/or abstract of the paper in the box, and click on 'Find journals', 'Find authors' or 'Find Articles'. Jane will then compare your document to millions of documents in PubMed to find the best matching journals, authors or articles.

**Keyword search**

Instead of using a title or abstract, you can also search using a keyword search, similar to popular web search engines. Click [here](#) to search using keywords.

**Beware of predatory journals**

JANE relies on the data in PubMed, which can contain papers from predatory journals, and therefore these journals can appear in JANE's results. To help identify high-quality journals, JANE now tags journals that are currently indexed in MEDLINE, and open access journals approved by the Directory of Open Access Journals (DOAJ).

SUPPORT DOAJ

DOAJ (Directory of Open Access Journals)

DOAJ is a community-curated online directory that indexes and provides access to high quality, open access, peer-reviewed journals. DOAJ is independent. All funding is via donations, 40% of which comes from [sponsors](#) and 60% from [members and publisher members](#). All DOAJ services are free of charge including being indexed in DOAJ. All data is freely available.

DOAJ operates an education and outreach program across the globe, focussing on improving the quality of applications submitted.

# Criteria for selecting a journal

Criteria	Considerations
<b>Scope</b>	Does your research fall within the scope of the journal? Is this a journal that is used by you, your mentors, or colleagues?
<b>Audience</b>	Who is your desired audience? International? Very specific research area?
<b>Publication Types and Format</b>	Some journals publish specific types of research and may not be appropriate if you have a specific manuscript type in mind.
<b>Reputation</b>	Published by a recognized publisher or society? Who are the editors/editorial board? Who has published in it? Impact factor?
<b>Quality</b>	Peer reviewed? Indexed in MEDLINE, Scopus or Web of Science? Do articles meet your standard for rigor and quality?
<b>Editorial Policies</b>	Word count restrictions? Allows authors to comply with funder public access mandates? Posts statement of ethical practices?
<b>Access</b>	Does the journal allow for free access to their articles? What are the open access options and is there a fee?

# A reputable journal's website makes it easy to find:

- ◆ Editor
- ◆ Editorial Board
- ◆ Abstracting & Indexing
- ◆ Highlighted Articles
- ◆ Benefits
- ◆ Guide/Instructions for Authors
- ◆ Sample Issue(s)
- ◆ Journal Metrics\*

The screenshot displays the homepage of the Journal of Professional Nursing. At the top, the breadcrumb trail reads 'Home > Journals > Journal of Professional Nursing'. Social media icons for Facebook, Twitter, and Email are in the top right. The journal's cover image is shown on the left, with the ISSN 8755-7223 listed below it. A vertical menu on the left contains links: 'Submit Your Paper', 'Supports Open Access', 'View Articles', 'Guide for Authors', 'Abstracting/ Indexing', 'Track Your Paper', 'Order Journal', and 'Sample Issue'. The main content area on the right includes the journal title, its affiliation with the American Association of Colleges of Nursing, the editor's name (Patricia Gonce Morton, PhD, RN, ACNP-BC, FAAN), and a link to the editorial board. A paragraph describes the journal's scope, accepting articles on nursing education, research, and policy. A 'Benefits to authors' section lists perks like free PDFs and copyright discounts. A link to the 'Guide for Authors' is provided. Below this, a 'Most Downloaded' section lists two articles: 'The History of Evidence-Based Practice in Nursing Education and Practice' by April Mackey and Sandra Bassendowski, and 'A New Leadership Development Model for Nursing Education' by Jane M. Miles and Elaine S. Scott. A 'Webinar' section promotes a session on mindfulness in the laboratory. At the bottom, a 'Latest Mendeley Data Datasets' section describes the repository's free-to-use and open access nature.

# Predatory Journals & Publishers

Let's Switch Gears

# Beware the “predatory publisher”

“... the name most frequently used to describe a nebulous concept of research journal publishers who use unethical business practices, minimal or no peer review, or limited editorial oversight to publish articles that are below a minimally accepted standard of quality.”

Ross-White et al (2019). Predatory publications in evidence Syntheses. Available from: <http://dx.doi.org/10.5195/jmla.2019.491>

Shen and Bjork (2015). ‘Predatory’ open access: a longitudinal study of article volumes and market characteristics. Available from:

<http://dx.doi.org/10.1186/s12916-015-0469-2>

# Predatory publishing tactics

- ◇ Aggressively soliciting article submissions;
- ◇ Promising rapid publication;
- ◇ Eliminating or automating peer review;
- ◇ Not following reporting or publication guidelines (CONSORT, COPE);
- ◇ Not submitting content to major indexing and abstracting databases;
- ◇ Cloaking APCs until the article has been published;
- ◇ Misrepresenting editorial board;
- ◇ Refusing to withdraw a manuscript;
- ◇ Harassing authors to submit payment.

# Characteristics of predatory publishers

- ◆ Overly broad scope (includes biomedical and non-biomedical subjects)
- ◆ Spelling and grammatical errors on website
- ◆ Poor quality images
- ◆ Homepage language targets authors
- ◆ Index Copernicus Value is promoted as a quality indicator
- ◆ Lack of information about manuscript handling
- ◆ Accepts or requests manuscripts by email
- ◆ Rapid publication is promised
- ◆ No retraction policy
- ◆ No information on whether or how content will be archived
- ◆ Low article processing charges
- ◆ Journal retains copyright or does not mention copyright
- ◆ Non-professional contact email address (e.g., @gmail.com or @yahoo.com)

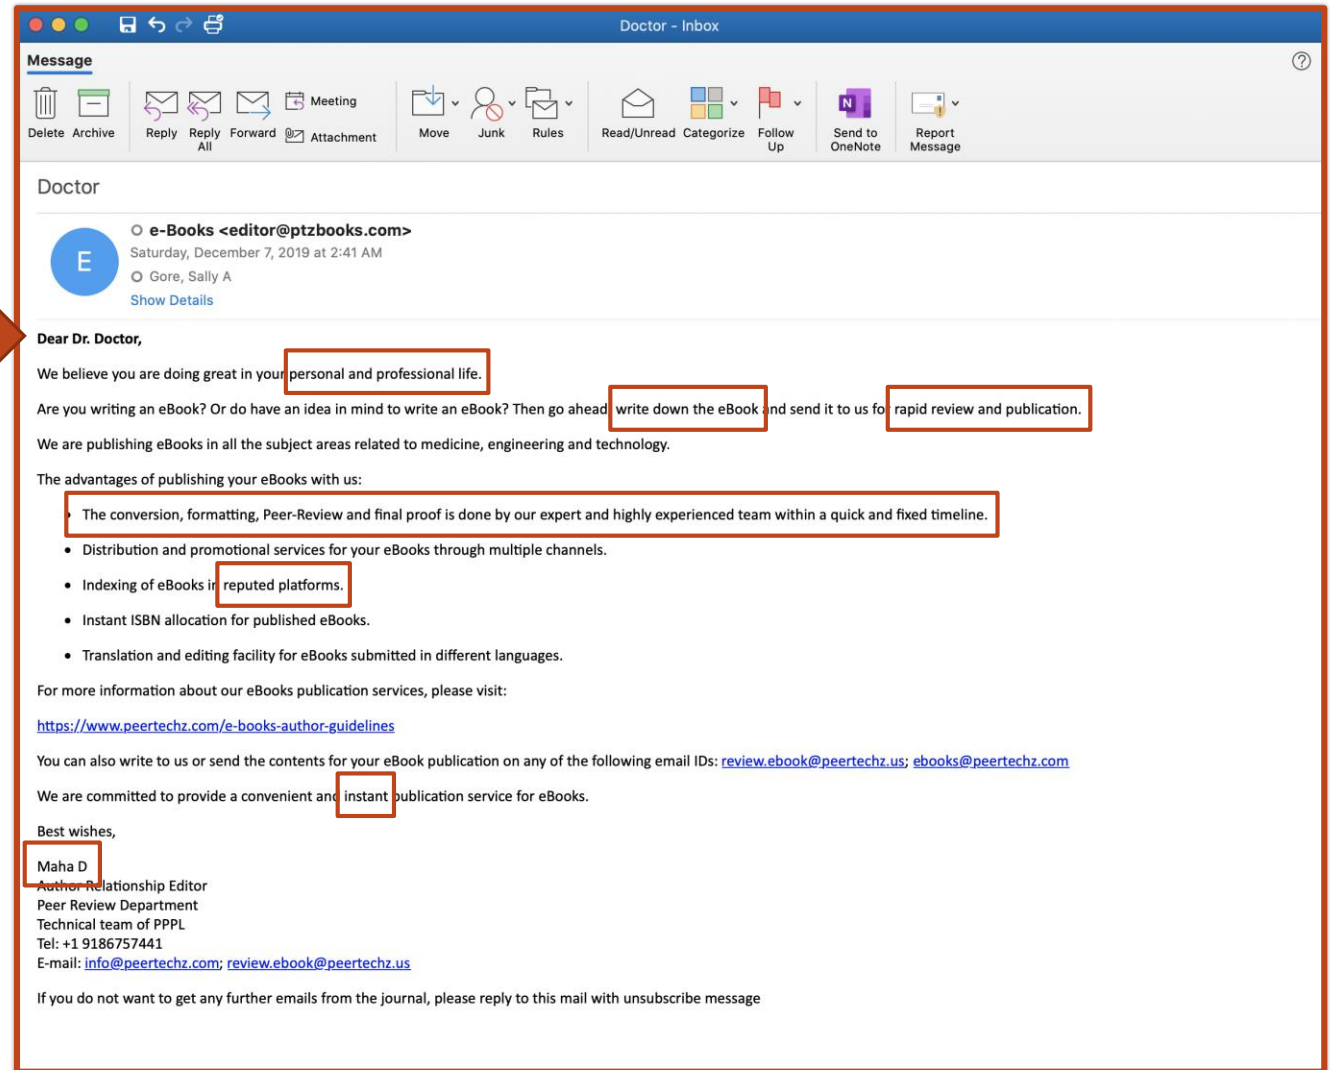

---

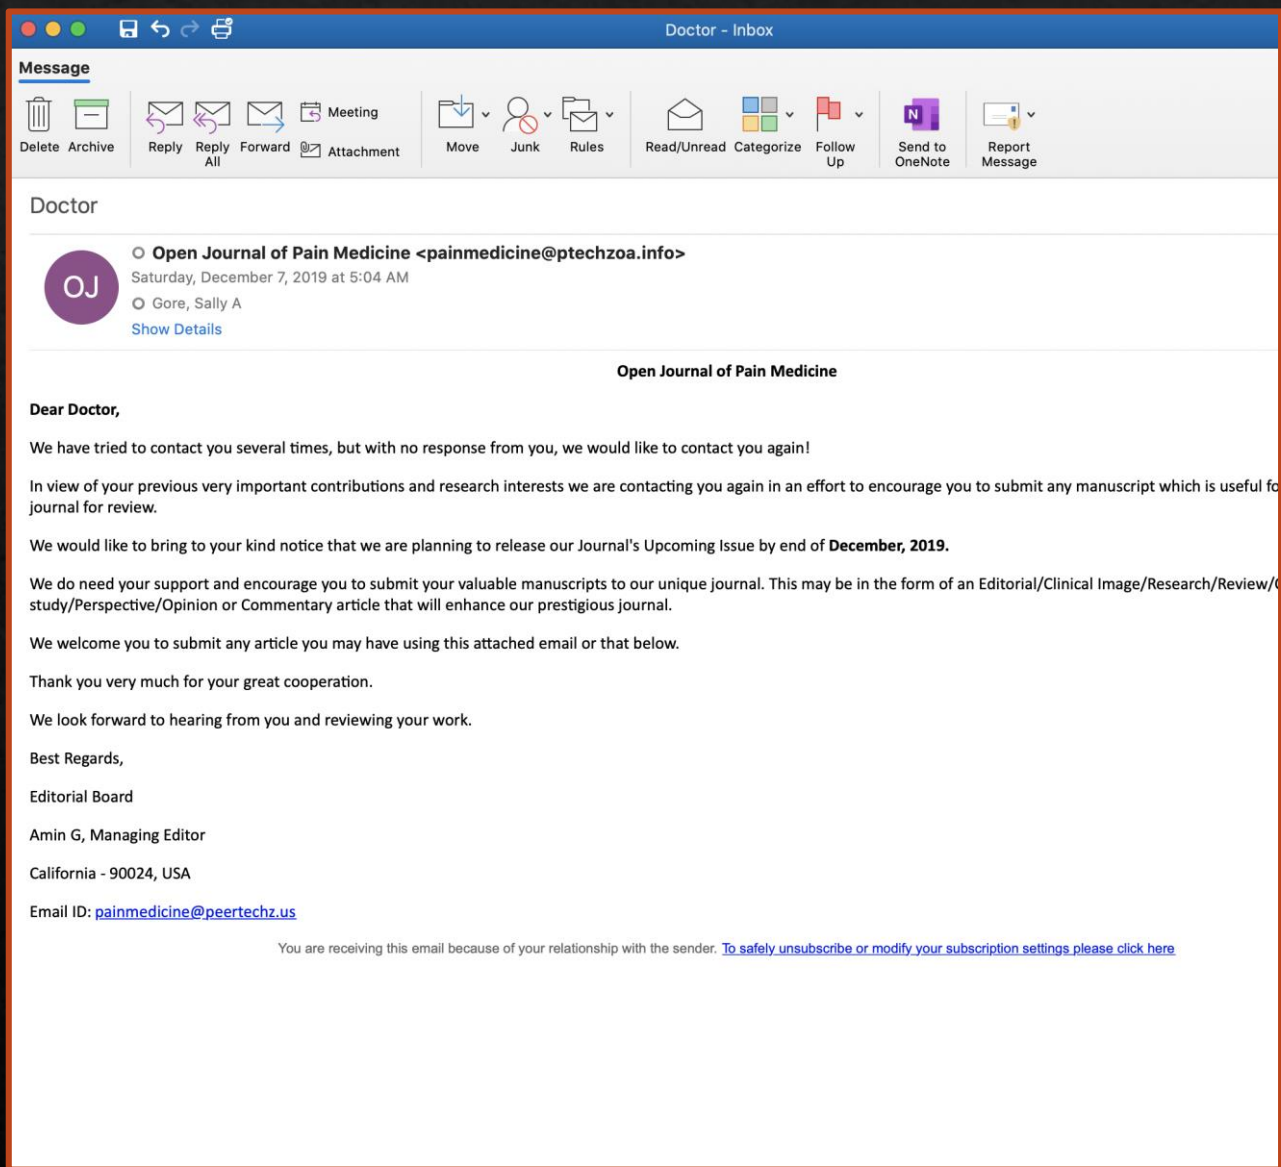

Shamseer L, et. al., 2017. Potential predatory and legitimate biomedical journals: can you tell the difference? A cross-sectional comparison. BMC Medicine 15(28)  
doi: [10.1186/s12916-017-0785-9](https://doi.org/10.1186/s12916-017-0785-9)

Shamseer L and David Moher. 2017. Thirteen ways to spot a 'predatory journal' (and why we shouldn't call them that). Times Higher Education World University Rankings. March 27, 2017. Available from: <https://www.timeshighereducation.com/blog/thirteen-ways-to-spot-a-predatory-journal-and-why-we-shouldnt-call-them-that>

# What's going on here?

Or here?

# Open Access Publishing ≠ Predatory Publishing

- ◆ The Open Access model does not change or impact the submission, peer-review, or editorial processes for journals.
- ◆ There are high impact open access journals in a wide range of disciplines, e.g. BMJ, PLOS Medicine, BMC Medicine, Annals of Family Medicine, Journal of the American Board of Family Medicine, BMC Family Practice
- ◆ “Our findings indicate that the methodological quality of studies published in OA and non-OA journals, as well as the quality of reporting, are comparable.”
- ◆ Not all Open Access journals charge article processing charges.

Meet Inspiring Speakers and Experts at our 3000+ Global **Conferenceseries** Events with over 600+ Conferences, 1200+ Symposiums and 1200+ Workshops on Medical, Pharma, Engineering, Science, Technology and Business

## Nursing & Healthcare Journals

Share this page [f](#) [t](#) [in](#) [p](#) [e](#)

Nursing and healthcare deals with various aspects of patient care. The role of nursing in imparting quality medical treatment to ailing patients cannot be undermined. On the other hand public health care nurses focus on adopting and educating masses on the various important health aspects viz. personal and community hygiene, vaccination programs and other population specific treatment practices, for the benefit of an entire population. Hence, research and development of contemporary nursing and healthcare practices will help in uplifting the health status of a person, family as well as a specified population.

### Nursing & Healthcare Journals Impact Factors List

Journal Name	Journal Impact Factor*	Citations Report
Quality in Primary Care	1.55 4.73 (5 Yr Journal Impact Factor)	Citations Report
International Journal of Emergency Mental Health and Human Resilience	1.32 3.25 (5 Yr Journal Impact Factor)	Citations Report
Diversity & Equality in Health and Care	1.43 2.45 (5 Yr Journal Impact Factor)	Citations Report
Journal of Community Medicine & Health Education	1.73 2.15 (5 Yr Journal Impact Factor)	Citations Report
Clinical Investigation	1.08 1.75 (5 Yr Journal Impact Factor)	Citations Report
Journal of Health & Medical Informatics	1.25 1.5 (5 Yr Journal Impact Factor)	Citations Report

## About Us

We are a group of publications including iMedPub LTD and Conference Series LLC LTD. We Organize 3000+ **Conferences** across USA, Europe & Asia with support from 1000 more scientific **societies** and Publishes 700+ **Open Access Journals** which contains over 50000 eminent personalities, reputed scientists as editorial board members.

We are an organization that amalgamates **Open Access Publications** and International science events for the benefit of the global scientific community. The organization was established in the year 2007 with the sole aim of providing a platform for "Open Access" to the research information pertaining to diversified fields of Science and technology. We publish **scholarly journals** that can be easily accessed online without paying any subscription charges. Our organization plays an instrumental role in expanding the reach of research data in the real time, which in turn helps in furthering the research. Research Scholars, Students, Libraries, Educational Institutions, Research centers and industries are the main stakeholders that are benefitted from open access to research data. We also organize 3000+ **International conferences** across the globe, where knowledge transfer takes place through debates, round table discussions, poster presentations, workshops, symposia and exhibitions.

Founding Director **Dr. Srinubabu**

**Choose the right journal for your research**

<http://thinkchecksubmit.org/>

**Are you submitting your research to a trusted journal?  
Is it the right journal for your work?**

- More research is being published worldwide.
- New journals are launched each week.
- Stories of publisher malpractice and deception are also on the rise.
- It can be challenging to find up-to-date guidance when choosing where to publish.

How can you be sure the journal you are considering is the right journal for your research?

## CHECK

**Reference this list for your chosen journal to check if it is trusted.**

- Do you or your colleagues know the journal?
  - Have you read any articles in the journal before?
  - Is it easy to discover the latest papers in the journal?

---

- Can you easily identify and contact the publisher?
  - Is the publisher name clearly displayed on the journal website?
  - Can you contact the publisher by telephone, email, and post?

---

- Is the journal clear about the type of peer review it uses?

---

- Are articles indexed in services that you use?

---

- Is it clear what fees will be charged?
  - Does the journal site explain what these fees are for and when they will be charged?

---

- Do you recognise the editorial board?
  - Have you heard of the editorial board members?
  - Do the editorial board mention the journal on their own websites?

---

- Is the publisher a member of a recognized industry initiative?
  - Do they belong to the [Committee on Publication Ethics \(COPE\)](#) ?
  - If the journal is open access, is it listed in the [Directory of Open Access Journals \(DOAJ\)](#) ?
  - If the journal is open access, does the publisher belong to the [Open Access Scholarly Publishers' Association \(OASPA\)](#) ?
  - Is the journal hosted on one of INASP's [Journals Online](#) platforms (for journals published in Bangladesh, Nepal, Sri Lanka, Central America and Mongolia) or on [African Journals Online](#) (AJOL, for African journals)?
  - Is the publisher a member of another trade association?

**If you can answer 'yes' to most or all of the questions on the list.**

Complete the check list and submit your article only if you are happy you can answer 'yes' to most or all of the questions.

- You need to be confident your chosen journal will have a suitable profile among your peers to enhance your reputation and your chance of gaining citations.
- Publishing in the right journal for your research will raise your professional profile, and help you progress in your career.
- Your paper should be indexed or archived and be easily discoverable.
- You should expect a professional publishing experience where your work is reviewed and edited.
- Only then should you submit your article.

## Part II: Predatory Conferences

# 9 Signs that a Conference is Fake

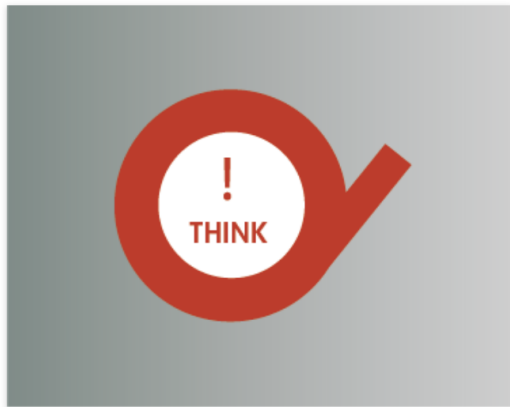

---

Campbell, B (2019). Adapted from Beall's Criteria for Determining Predatory Conferences. Ex Ordo Conference Software, <https://www.exordo.com/blog/9-signs-this-is-a-fake-conference/>

1. The conference has an overly ambitious title.
2. The technical program is very broad.
3. The language on the conference website is ... off.
4. Renowned organizations are sponsoring a low-profile conference.
5. The organizer's contact details are missing or aren't quite right.
6. Another conference with a suspiciously similar name already exists
7. The conference or its organizers have known associates.
8. The organizers are charging higher-than-normal fees.
9. The conference is unusually frequent.

## Why Think. Check. Attend.

*Think. Check. Attend. is an initiative that aims to guide and assist researchers and scholars to judge the legitimacy and academic credentials of conferences in order to help them decide whether to or not attend the same. Nowadays, the scholarly community faces an increasing number of invitations to present at or attend conferences. Some of these are respectable, academic events, while others are misleading, exaggerated or even fake. Think. Check. Attend. provides guidelines that help researchers to differentiate between an authentic conference and the one they should avoid. In this initiative, we help scholars to recognise the characteristics of a trusted conference to attend and submit their abstracts through a number of steps and a check list. Simply follow these steps and you will rest assured that you attend only the most appropriate conferences.*

Is it the right conference to attend and present your research?

This check list provides guidance on trusting a conference to attend and present your research.

Complete the check list and attend the conference.

<https://thinkchecksubmit.org/think-check-attend/>

Is it the right conference to attend and present your research?

Are you submitting your abstract to a trusted conference?

- New conferences are announced each year.
- Stories of questionable and fake conferences are also on the rise.
- It can be challenging to find up-to-date guidance when choosing the right conference to attend.
- How can you be sure the conference you are considering is the right conference to attend and present your research?

# Start Here

# Check These

This check list provides guidance on trusting a conference to attend and present your research.

## Organizers & Sponsors

- Are you aware of the society or the association organizing this conference?
- Can you easily identify the venue of the conference?
- Is it the first time that this conference is being held?
- Have you or your colleagues attended this conference before?
- Is it clear what fees will be charged (conference fee, registration fees, ..., etc.) and would these be waived if you are accepted as a speaker?
- Are any of the sponsors involved in the conference?
- Are you aware of any of them, especially with industry-related fields such as Engineering & Bio-medical research?
- Did you check the conference website? Is all the information (such as the attendance fees, submission date, conference date, editorial committee, program details and venue) presented in a proper way?
- Have you read any papers from this conference proceedings before?

## Agenda & Editorial Committee

- Is there a clear information about the timeline and the agenda for the conference?
- Do the scope and objectives of the conference fit your field and core interest or not?
- Have you heard of the Keynote speakers?
- Is the Editorial Committee listed on the website?
- Have you heard of the Editorial Committee members before?
- Is the Committee clear about the editorial control over presentations and the type of peer-review it uses?

## Conference Proceedings

- Is the Organizing Committee clear about where the proceedings will be published?
- Does the conference make it clear which indexing services it can guarantee the published proceedings and to which indexers will it submit the proceedings for evaluation?
- Is the publisher of the proceedings a member of a recognized industry initiative such as COPE, DOAJ, OASPA?
- Also refer to Think. Check. Submit. check list for more details about publishing in the right journal at <https://thinkchecksubmit.org/check/>.

Complete the check list and **attend** the conference or **submit** your abstract only if you are satisfied and you can answer 'yes' to most or all of the questions.

- Attending the right conference will give you the opportunity to maintain your awareness of the latest updates and improvements in your field.
- Attending the right conference will enhance your career and expand your connections within the academic community.
- Publishing your **Conference Paper** under a professional publishing experience, where your work is reviewed, edited, indexed and easily discoverable will enhance your reputation and your chance of gaining citations.
- Only then should you attend and present your research at this conference.
