

Competitive Energy Services (CES) takes great pride in being innovative and providing our customers with customized services that take into consideration their unique requirements. We understand that every dollar is important to the institution's bottom line and we explore creative ways to manage to the lowest possible cost.

PROCUREMENT

CES customizes our procurement services based upon the needs of each client. We have established business relationships with dozens of energy suppliers and offer some of the most sophisticated pricing products in the industry. Our transparent and robust competitive bid process, along with continuous market monitoring, informs our recommendations and results in the lowest energy cost in any given market.
