Severe Weather Cancellations

The safety and security of our Standardized Patients is a priority, and events or sessions may be canceled in cases of severe weather or unforeseen circumstances.

iCELS staff will work with clients to determine whether an event will be canceled. If an event is canceled, faculty and SPs will be notified at that time by email. SPs will receive follow-up communication regarding rescheduled days and times. Where possible, the SPs who were canceled due to weather will be given priority to work the project as dates are rescheduled.

Canceled sessions due to severe weather are not paid.

- Aim is to have schedule changes or cancellations finalized at least 12 hours in advance when possible.
- In the case of unforeseeable emergencies (tornado, etc.) the school will follow central decision-making regarding campus closure.

Reliability and accountability to our clients is paramount, and we also understand that SPs attend projects from a variety of locations and must consider their own individual safety when commencing travel; any SP who feels it is unsafe to attend a required session due to weather should contact the Event Manager immediately.
