RESEARCH COMPUTING

Lab IT Solutions

Research Computing

Lab IT Solutions

The IT operations in a laboratory encompass more than just computers and printers. The varied instrumentation needed for research means that maintaining optimal performance of laboratory IT can be very complicated.

PREVENTIVE MAINTENANCE & CALIBRATION

The RCS Lab IT team will inventory your PC's & Equipment to proactively manage the hardware & software updates, and system requirements.

LEGACY SUPPORT, SECURITY & IMAGING

The Lab IT team will provide direct lab legacy system support and help you develop a strategy to protect your lab against hardware malfunction and virus attacks.

WORKFLOW & TECHNOLOGY ANALYSIS

The RCS Lab team can review and analyze your current technologies and processes to see if there are more efficient and economical ways of conducting your business and research, like Sample management or eLab Notebooks.

VENDOR COORDINATION & MANAGEMENT

Let us help you work with the instrument vendors to ensure integrations and updates are implemented quickly, efficiently & smoothly

Bringing Technology & Innovative Solutions to Labs.
