IBD for Primary Care Providers

Attendees will be:

1. Updated on the pathogenesis, diagnosis and treatment of Inflammatory Bowel Disease (IBD) to include a brief discussion of the evidence available for the effectiveness of diet and probiotics.

2. Become familiar with “best practices” when caring for patients with IBD.

3. Will learn IBD Quality Assessment Indicators as recently proposed by the American Gastroenterological Association, indicators which can be readily implemented by primary care providers.

4. Provided with a copy of the slides used in this presentation.
