

“Working with Dr. B, I was able to experience the diversity available within family medicine. I had the opportunity to see patients at his family medicine practice in Shrewsbury, conduct pre-participation sports physicals for athletes at Holy Cross and conduct intake appointments for patients beginning opioid replacement therapy. I was surprised at the broad range of patient care he incorporated into his career and how he was able to pursue multiple passions. Seeing this diversity reassured me that within whatever specialty I choose, I will have the opportunity to craft it to fit my interests.”

- Kat Bailey, Class of 2016

“Working alongside practicing physicians in my Longitudinal Preceptorship has helped me learn and reflect on dimensions of working with patients outside of the classroom or simulation lab. One of the most important experiences for me was watching true patient-provider relationship building. Seeing it modeled well will stick with me as I continue my career in medicine and as healthcare continues to evolve as a partnership between patients and providers.”
