Course Number:	AN-401
Elective Type:	B1
Department:	Anesthesiology
Sites Available:	UMMHC-Memorial Campus
Months Offered:	E1, M1 through M10
Number of Students / Month:	1
Prerequisites:	None
<p>Elective Description: Interventional Pain Medicine is a fast-growing specialty that focus on the interruption of painful stimuli in order to allow faster recovery and prevent chronic debilitating painful syndromes. The rotation consists of 2 days of procedures, which medical students serve mostly as observers. Two (2) days of clinics in which the medical student has a hands-on experience. In addition, 1 day of operating room in which the medical student will share time with the resident and participate in the case.</p> <p>It also involves inpatient consults in which the medical student participates hands on. At the end of the rotation the medical student will have a complete experience of an outpatient chronic pain clinic setting. It will also solidify the inpatient experience in the management of pain.</p>
