CAREERS IN MEDICINE: E*VALUE OPTIMIZATION SCHEDULING
ADVANCED STUDIES REQUIRED COURSES AND ELECTIVES
CLASS OF 2019

The list below shows the number of students allowed per site for the Advanced Studies (AS) <u>required</u> courses along with a few optional electives. MD program students are required to schedule (1) Sub-Internship, (1) ECPS, (1) ABTS and (1) Capstone course. MD/PhD students are required to schedule the Sub-Internship and ECPS; those who matriculated in 2012 or later also schedule Capstone. In addition, all students can request <u>some</u> optional Type A and B1 electives in EVOS.

Initial assignments to required courses and certain electives will be made using the E*Value Optimization Scheduler (EVOS) module. While the computer tries to honor student's preferences, no guarantee can be made that a student's preferences will be reflected in actual course assignments.

Please **DO NOT schedule required AS Courses** in the same time-period you are planning to do **ACLS, USMLE Exams, or Residency Interviews.**
