Reoccurring Themes

• Formal Accommodations
• Loss of Identity
• Fear
  – Of being kicked out
  – Of being involuntarily hospitalized
• Affordability
Ryan’s Story

Fulfilling My Dream

“Ryan – Fulfilling My Dream” – Center for Practice Innovations at Columbia Psychiatry New York State Psychiatric Institute Consumer and Family Video Portal
Formal Accommodations –
What Else Is Available?

“[Disability Services] gave me the accommodations of extra time on tests and a note-taker. I asked if there was anything else available, and they asked what else I wanted. I had no idea what else was available to even ask for.”
Loss of Identity –
Who Am I Without School?

“Before my diagnosis I was very good at school. I was a good student and was super socially engaged. My identity was kind of tied to my role as a student. When I started developing mental health symptoms I was literally failing school. It was a huge blow to my self-esteem and the idea I had of myself as a high achiever.”
Fear of Involuntary Hospitalization

“After the loss of a friend from suicide, I tried out my college’s counseling center but instead of receiving any help I was scared away from their threat of hospitalization, and I never reached back out because I didn’t want to be kicked out of school. They were scared of liability, but I just wanted someone to talk to.”
Will They Kick Me Out?

“Eventually the school was like, ‘this is not a treatment facility. Like, we can’t babysit you. You have to leave.’ And I think that’s really hard for people... [to] hear stuff like that. And they’re like, ‘Well now I don’t want to seek treatment because now I’m going to [have to] leave school... The school sent me a letter that said, ‘you have two choices. Go to treatment or you can’t come back.’ ”
I Can’t Afford to Take Time Off

“I truly wanted to go inpatient at one point, but I was concerned that if I did withdraw from classes that I wasn’t going to get a refund and I would’ve wasted all that money. And that was really the only thing that kind of kept me in school.”
Discussion

• Do these stories resonate with your own experiences of working with individuals with serious mental health conditions in working towards their education goals?

• Are there other challenges that haven’t been discussed?
What Does Supported Education Look Like?

Marsha Ellison
Meeting the Need:
Supported Education as a PSR Approach

What is supported education?

“Education in integrated settings for people with severe psychiatric disabilities for whom postsecondary education has been interrupted or intermittent as a result of a severe psychiatric disability and who, because of their [impairment], need ongoing support services to be successful in the education environment.”

What Does Supported Education Do?

• Offers support to individuals with mental illness to take advantage of skill, career, educational and inter-personal development opportunities within postsecondary educational environments.
Current Principles

- Integration into normalized integrated academic settings
- Individualized services
- Driven by individual’s choice
- Flexible array of services
- Varying intensity of supports according to need
- Community-based mobile services
- Coordination with schools, and other key players

Choose, Get, Keep, Leave
Approach to Supported Education
“Choose” Activities

• Assess readiness for school
  – Academic history
  – Student loans
  – Supports for school
  – Motivation

• Set an educational goal (e.g. training certificate or degree – 2 year, 4 year)
  – Develop an occupational goal

• Choose a school/training setting and program
  – Describe personal criteria for schools/training
  – Visit schools

• Create an Educational “Roadmap”
  – Overall goal, steps, timeline, who does what, contingency plan
“Get” Activities

• Apply for financial aid
  – FAFSA, Veteran Benefits, Voc Rehab, bad loans

• Budgeting for school
  – Work school balance
  – Current finances

• Applying to school or training program (task list)
  – Register for classes
  – Access course load
  – Placement exams
“Keep” Activities

- The first day – transportation, location, timing
- Managing the classroom
- Acquiring accommodations
- Calendaring, using the syllabus
- Academic supports: tutoring, study skills
- Campus resource mapping
- Social supports
- Coping skills
“Leave” Activities

• Anticipate what’s needed
• Withdrawing, not failing
• Negotiating a medical leave of absence
• Negotiating a return
Other Current Approaches

- Supported education as part of campus disability services
- Supported education as a stand-alone service in a CMHC
- Supported education integrated with supported employment (resulting in Career Services)
- Supported education for specific populations, e.g., first episode, Veterans, high school drop-outs
Discussion

• Are these strategies you use as psychiatric rehabilitation practitioners?

• What are other strategies you employ?

• In your experience, what are the barriers to addressing education goals?
Real World Examples of Supported Education

Kate Biebel
Real World Supported Education

• Learn from innovative education initiatives
• Goal – to understand how education supports are operationalized through the eyes and experiences of:
  – Those who **deliver** supports
  – Those who **receive** supports
• Site visits to 3 education support initiatives across the US
Research

• What sites exist?
  – Informed by literature, key stakeholders, supported education research and training experts (n=25)

• Where is innovation happening?
  – Informed by stakeholders and experts (n=15)

• What are our selection criteria? (n=3)
  – 1 site targeting individuals with first episode psychosis
  – 1 site in a community mental health setting
  – 1 site in a postsecondary education setting
  – Geographic diversity
Methods

• Each site visit – 2 days in April and May 2015
• Goal was to learn about:
  – Program/initiative overview, history, services offered, participation engagement, staffing, financing, evaluation efforts, service context, and successes and challenges
• One-on-one meetings and group discussions
• All sites included 1-2 group discussions with individuals with mental health concerns receiving education support services
Where Did We Go?

• Early Assessment and Support Alliance: EASA is a statewide effort in Oregon to address the needs of young adults, which includes educational needs. EASA focuses on individuals experiencing first episode of schizophrenia-related conditions.

• Learning Enhancement and Resource Network: LEARN is a standalone supported education program in a New Jersey community-based mental health center, within a larger health care system. LEARN supports individuals of any age with mental health concerns.

• The University of Minnesota: The U of M has a campus-wide initiative to support the mental health needs of all students. Their Provost committee on Student Mental Health has prioritized mental health and wellness campus-wide, created a culture of attention and resources to support student mental health.
Early Assessment and Support Alliance (EASA)

• History
  – Began in 2001 in 5 counties in Oregon
  – Prioritization of implementation of evidence-based practices

• Service Approach
  – Transitional program providing supports for up to 2 years
  – Integrated evidence-based practices (e.g., Cognitive Behavioral Therapy, Individual Placement and Support)

• Financing
  – In 2015, 6 Million to deliver EASA. Mix of state general funds, Medicaid reimbursement, private insurance, vocational rehabilitation
Early Assessment and Support Alliance (EASA)

- **Staffing**
  - Primarily occupational therapists, some peer support
  - In Oregon, occupational therapists can bill third-party payers

- **Philosophy**
  - “Whatever it takes” approach
  - Meeting young adults where they’re at
EASA Young Adult Voice

• Goals?
  – Employment and education
  – Be independent, do better
  – Find love & a girlfriend

• What supports are important?
  – They get to know you as people, not patients - relationships
  – Treating me with care and kindness
  – Getting connected with concrete services
  – Hope – focus on what’s possible
Learning Enhancement & Resource Network (LEARN)

• History
  – Began in 2007 within behavioral health division of health care system
  – LEARN is within Career Services (Supported Employment and SEd)
  – Serving 10 colleges across 4 counties

• Service Approach
  – Standardized approach and training, emphasis on skill development, education and use of tools for Education Coaches
  – Quarterly training and technical assistance

• Financing
  – Contract for service with NJ Division of MH and Addiction
  – Some funding through vocational rehabilitation to cover tuition costs
Learning Enhancement & Resource Network (LEARN)

• Staffing
  – Small team of education coaches and specialists
  – Majority of time in community and on campuses; close relationships with college departments of counseling, disability and health

• Philosophy
  – Rehab focus, with emphasis on learning skills that can be repurposed to new settings
LEARN Young Adult Voice

• What’s different?
  – “with counseling you talk about the issues (anxiety), but with LEARN you discuss strategies and coping with anxiety specific to academics”

• What helped?
  – Academically related organizational supports
    • Time management
    • Scheduling
    • Procrastination
  – Navigation of school environment – supports, accommodations
  – Having someone to be accountable to, built on a trusting relationship
  – Technology – apps for scheduling, mindfulness
What are the tools that providers can use to support education goals of young adults?
Sample Educational Road Map

My current educational goal:
I want to go back to school and get my HVAC license

Why is that goal important to me?
So I can find a good job working with my hands and provide for my family. After I get some experience I might want to open my own business.

When do I want to achieve this goal?
About 2-3 years.

What are all the possible steps I need to take to complete this goal?
• Identify schools with a good reputation and a good job placement rate for HVAC. (1 month)
• Find out how much my GI Bill will cover for tuition. (1 month)
• Decide which schools I can afford. (1 month)
• Find out how I apply to that school (1 month)
• Apply to the school (3 months)
• Get accepted and enroll (3 months)
• Get my schedule for the first semester (3 months)
• Start classes (3 months)
• Do well in classes to progress to next class (6 months)
• Complete all school requirements (in about 2 years)
• Find a job (in about 2 years)

What steps needs to be done first?
Mark which steps I need to take in next 1 month with a 1.
Mark which steps I need to take in next 3 month with a 3.
Mark which steps I need to take in next 6 month with a 6.

For each step:
What will I do to achieve this goal?
What will my VetSEd provider do to achieve this goal?
Who can help me with this goal, and what they can do to help?
What will I do if I have trouble meeting this goal?

Step:
• Identify schools with a good reputation and a good job placement rate for HVAC.
  (1 month)

What will I do?
  o I will ask my buddies with HVAC licenses where they went to school and what they thought of it.
  o I will search online for school with HVAC programs near me.
  o I will complete Worksheet #4: My Personal Criteria for Schools/Training Programs Checklist so that I have a good idea of what aspects of a school are most important to me
  o I will review Worksheet #6: School Choice Checklist: Possible Questions for Campus Visit and list additional questions I have about each school

What will VetSEd provider do?
  o We will look on-line to identify different schools in the area and their graduation and placement rates.
  o We will go over my list of school criteria (Worksheet #4)
  o We will go visit schools I am interested in and fill in Worksheet #6

Who else can help and what can they do to help?
  o My friends and family can ask questions about what I have learned so far about schools and they might come up with questions I need to have answered that I didn’t think about.

What will I do if I have trouble meeting this goal?
  o I will ask my VetSEd provider or my friends who already have done this for help.

</table>
Sleep Hygiene

• Deep Sleep with Andrew Johnson
• $2.99
• iPad/iPhone
• Guided sleep support
Stress Management

• Breathe2relax
• Free for iPad/Phone
• Helps users learn the stress management skill called diaphragmatic breathing.
• Breathing exercises have been documented to decrease the body’s ‘fight-or-flight’ (stress) response, and help with mood stabilization, anger control, and anxiety management.
Organization

- iStudiez Pro (or Lite)
- $9.99 (or Free)
- iPad/phone or Android
- Tracks classes, deadlines, homework assignments, grades
Procrastination/Time Management

• Pomodoro technique
• Free or iPad/phone or Android
• Time management that incorporates breaks and rewards
Question and Answer
