

## Randomizing Test Questions

Questions and answers within a Bb Learn test can be randomized to help discourage academic misconduct. This document outlines the process for Randomizing Questions on a single test attempt.

1. **Locate** the test you would like to randomize test questions, **Click** the down Arrow and **Select** Edit Test Options

2. **Scroll Down** to the Test Presentation Section. Here you will see the Option to Randomize Questions. **Click** the checkbox to randomize your test questions.

A screenshot of the Blackboard Learn 'TEST PRESENTATION' section. It contains three options: 'All at Once' (selected), 'One at a Time', and 'Prohibit Backtracking'. Below these, the 'Randomize Questions' checkbox is highlighted with a red box. The text 'Randomize questions for each test attempt.' is visible below the checkbox.

3. **Click** Submit to save your changes.
